Launching a Community of Practice

Gathering for 2 days can support the work of building partnerships that deliver value to patients, payers and pharmacist providers. But "Rome wasn't built in a day" and thus there is a need to keep the networking, conversations and commitment to leadership of the Align Summit active.

This session will launch the formation of the RITZ Community of Practice facilitated by AIMM as a post-summit engagement opportunity. The RITZ Community of Practice will provide a national forum that brings payers, providers, and other stakeholders together to share solutions and insights that work to improve medication use and patient health in their respective communities.

Facilitators:

Paul Scanlon, Project Lead, Alliance for Integrated Medication Management

Todd Sorensen, PharmD, Senior Executive Associate Dean for Strategic Initiatives and Professor, UMN College of Pharmacy

Anti-Trust Statement

The University of Minnesota College of Pharmacy complies with all federal and state antitrust laws at its meetings and conferences.

Attendees at the Minnesota Health Plan & Provider Summit must remember that their respective employers may be competitors in the marketplace. Federal and state laws prohibit the restraint of competition, including acting to restrain price, quality, or distribution of products. Competitors may not act in concert to restrict competition or the opportunities of competitors, suppliers, or customers.

As a result, there should be no discussion or agreement as to any matters which might give rise to an allegation of violation of antitrust laws, such as competitive information, at all meetings connected with the Summit, whether educational, social, or business events.

Examples of “competitive information” include (but are not limited to) discussions of:

- raising, lowering, or stabilizing prices or rates;
- actual current or future prices, rates, or rebates;
- what is a “fair” profit level;
- individual company results, or current or future marketing or pricing strategies;
- allocation of markets, territories, or patients; and
- any other matters on which pharmacists, pharmacy benefit managers, healthcare systems, or insurers ordinarily compete with each other.
